If You Want To Be Happy...

Scientology won't get in the way.

The actress Karen Black is a scientologist and she has been very successful.

Mike Schefter

I was looking over our recent guest list. Pinchas Gutter, who, after all, is the guy who invented Scientology, has been here, and so has Norma Shearer, the actress who, by the way, was pregnant when she was married to Charlie Chaplin. And, of course, there's Emma Goldman, the radical anarchist who was a Scientologist in her later years.

As I was looking over these names, I thought about the one thing that they all have in common: they all want to be happy. And I realized that Scientology is all about happiness. It's not about religion, or philosophy, or even science. It's about being happy.

Scientology has been around for more than 50 years, and in that time it has grown to be one of the largest religions in the world. But what makes Scientology different from all the others is its focus on happiness. Scientology does not try to convince you that there is a higher power or that you must follow certain rules in order to be happy. Instead, it teaches you how to find happiness within yourself.

Scientology's teachings are based on the belief that the human mind has the power to change itself. By understanding and changing your own thoughts and emotions, you can change your life. This is the core of Scientology's philosophy, and it's what makes it so unique.

Scientology has become more popular in recent years, particularly with the rise of celebrities who have become Scientologists. But Scientology is not just for the rich and famous. It is for anyone who wants to be happy. And if you want to be happy, you should join Scientology.

The way to happiness is simple: study Scientology. Learn its teachings, and put them into practice. It's not easy, but it's worth it. Because when you're happy, you're free. And that's what Scientology is all about.
San Felipe

If you leave your seat three minutes into the cross-eyed, unshaven, clove-chewing, black-dog-riding, buggy driver sitting in the booth, you can come back.

We have a lot of the fun at the San Felipe. And if you are trying to get some out of the house, be prepared for a little bit of a sacrifice.

First, we get a nasty surprise as you travel down the road, find a little car, and arrive at the spot. And if you are trying to get some out of the house, be prepared for a little bit of a sacrifice.

And they have a great little car show, just a little way off, and you can get in there and see it and then come back.

The Untouchables

The Untouchables, as well as any other brand of car manufacturer, wouldn't want to make it any easier for the police to chase us down on the road, and the attraction is that we are all invited and everybody is welcome.

Really Knowing Your Part

But of course you cannot have a Shakespeare festival with Eric Christmas playing all the parts, that would not be a festival but an orgy.

Jonathan Sawle

What makes a good portrait of Shakespeare? Well, how about human warmth, a sense of humor, a sensitivity for the forces of change and the dualism of character? Because, you see, it's not just about the words, it's about the whole experience, the whole man.

In the case of Eric Christmas, he has a way of making you feel like you're sitting right at the heart of the action, feeling all the emotions and experiences that come with being a character in Shakespeare's plays. And that's something that no other actor can do as well as he can. He's truly a master of the craft.

The world of acting is a tough one, and it takes a special kind of person to succeed in it. And Eric Christmas is exactly that kind of person. He's not just an actor, he's a storyteller, and he tells his stories with a skill and a passion that is truly inspiring.

So the next time you see a Shakespeare festival, remember to appreciate the effort and dedication that goes into it. And if you're lucky enough to see Eric Christmas in action, be sure to take a moment to appreciate what a gift he is to the world of acting.
