How to Protect Yourself from Your Lawyer

Jonathan Gage

It's hard to believe the same lawyer who once talked to me about the intricacies of your legal defense will later conclude that your case is hopeless. You can't help but wonder if your lawyer is just trying to make you feel better. How can you protect yourself from this kind of lawyer?

First of all, you need to ask yourself if you need a lawyer. If you're not sure, then it's best to consult with a lawyer you trust. You can also do some research online to find a lawyer who specializes in the area of law you need help with.

Second, you need to ask questions. Don't be afraid to ask your lawyer how much work he or she expects to do for your case. You also need to ask if the lawyer will keep you updated on the status of your case.

Third, you need to keep track of your expenses. If you're paying for your lawyer's services, you should know where your money is going. Make sure to get receipts for everything you pay.

Fourth, you need to communicate with your lawyer. Make sure you're clear on what your lawyer expects from you. Also, make sure you understand the legal terms your lawyer is using.

Fifth, you need to be aware of the deadlines. Make sure you know when important dates are, and make sure you're prepared for them.

Finally, you need to be prepared to fight. If your lawyer is not working up to par, you need to take action. You can try to negotiate a new fee arrangement, or even consider hiring a new lawyer.

Just to summarize, you need to ask yourself if you need a lawyer, ask questions, keep track of your expenses, communicate with your lawyer, be aware of the deadlines, and be prepared to fight. Only then can you protect yourself from your lawyer.

No Frills, Please

Free ornamentation is like being given a pair of rabbits: the gift itself is fine, but the consequences may be overwhelming.

Jonathan Saville

I have no idea what Jonathan Saville has been up to since he last worked with the Delfonics, but his contribution to the current revival of the Philadelphia soul sound is a welcome one. His new album, "The Sweetest Thing," is a testament to his ability to write and produce top-notch R&B. Saville's distinctive voice is perfect for the genre, and he's managed to create a sound that is both fresh and nostalgic.

The album opens with the title track, "The Sweetest Thing," which features a lush arrangement and Saville's smooth vocals. It's a perfect introduction to the album's soulful sound. The rest of the album continues in the same vein, with tracks like "I'll Be There" and "Can't Help Myself" showcasing Saville's versatility as a songwriter.

Overall, "The Sweetest Thing" is a great album for fans of Philadelphia soul. Saville has crafted a timeless sound that is sure to please both newcomers and die-hard fans of the genre. It's a must-listen for anyone who appreciates well-crafted R&B.
