How Much Is That Bobcat In The Window?
Polly Wants a Tortilla

I'll Take Two Pounds Of Shakespeare And Four Ounces Of Plate

Two young kids in the kitchen, one of them shouting, "You can't have a tortilla unless you have the plate." The other, still yelling, "You can't have a plate unless you have the tortilla." There are a million other ways to phrase it.

Even the Bernoulli Thought It Was Fantastic

When the penguin jumps in the ocean, he jumps into the air. He jumps into the water and then jumps out of the water. That's because of the Bernoulli principle.
Letters

Heart And Soul

I am sorry to hear that the ocean is dying. I think it is necessary for people to understand that we must take responsibility for the health of the ocean, and it is not enough to just pass laws or regulations. We must also take action to reduce pollution and protect marine life. If we continue to ignore the problem, the ocean will become a polluted and unhealthy place. It is important for us to recognize the importance of the ocean and work together to protect it.

Coraline M. Davidson

Colorado Springs, CO

Dear Editor:

I am writing to express my strong feelings about the recent events in the Middle East. It is important for us to understand that this conflict is not just about politics, but also about culture and religion. Both sides need to find a way to peacefully resolve their differences and coexist. We must work towards a solution that respects the rights and dignity of all people, regardless of their beliefs or nationalities.

Sensational Headlines

I want to call attention to the recent headlines about the election results. It is important for us to understand that the outcome of an election can have a significant impact on our lives. We must be aware of the issues and candidates, and make informed decisions when casting our votes. Let us work together to ensure that our voices are heard.

D. Thompson

San Francisco, CA

Dear Editor:

I am concerned about the recent reports of mass shootings in our country. We must take action to address the root causes of this problem and prevent future tragedies. It is important for us to support those affected by these events, and work towards a future where everyone can live in safety and security.

Aural Fixation

For decades, the 78-rpm record served as the primary medium for music distribution. However, the advent of the 45-rpm single and the LP record in the 1960s led to a decline in the popularity of 78s. Despite this, some audiophiles continue to enjoy the rich, warm sound of 78s.

The 78-rpm record was introduced in the early 1900s, and by the 1920s, it had become the standard format for music distribution. The records were made of hard rubber and could be played at 78 revolutions per minute. Despite their popularity, 78s were eventually replaced by the 45-rpm single and the LP record.

Today, 78s are considered a collector's item and can be found in specialty record stores and online marketplaces. Some audiophiles still prefer the sound quality of 78s over modern formats.

Confronted by Chrysanthemums

“We think of the beauty of a natural thing and we try to keep, to maintain that beauty. We have to arrange rocks and plants and water and trees to make a perfect scene with each part working together.”
