City Lights

But Will It Ever Be There?

For the past two women, it seemed that it would never be happening. It's been a long time coming for the San Francisco Bay Area. The dream of a generated energy from the ocean's current seemed so far away. The project, known as the Oceanic Power System, was conceived in the early 1970s, but it took until the late 1990s for the technology to mature. Now, after years of planning and development, the project is finally ready to take off.

The concept is simple: use the energy of the tides to generate electricity. The project involves building an underwater turbine that will extract energy from the incoming and outgoing tides. The electricity generated will be transmitted to the grid through underwater cables.

The site chosen for the project is a small tidal channel located in the San Francisco Bay, near the city of Richmond. The tides in this area are particularly strong, with a range of over 10 feet, making it an ideal location for the project.

Construction is expected to start later this year, with the first turbines going online in 2023. The project is estimated to cost around $1 billion and will generate enough electricity to power over 100,000 homes.

The backers of the project are optimistic about its success, and believe that it could be a model for future renewable energy projects. They hope that it will inspire other companies to invest in similar projects, and help to address the pressing issue of climate change.

But there are also concerns about the project. Some environmentalists worry that the turbines could damage marine life, and there are concerns about the impact on the local fishing industry. There are also questions about the long-term sustainability of the project, as the tides in the area are not always reliable.

Despite these concerns, the backers of the project are determined to make it a success. They believe that it will be an important step in the transition to a more renewable energy future, and hope that it will inspire others to follow.

I Covet the Waterose

May I introduce you to Beatle John, a man who has a passion for the beauty of water. John is the founder of the Waterose Foundation, an organization that works to preserve the world's freshwater resources. John is a true water lover, and he spends his days exploring the beauty of water in all its forms.

John has been working for over 20 years to protect the world's freshwater resources. He has traveled to over 100 countries, and seen firsthand the impact of water pollution and overuse. But despite the challenges, John remains committed to his cause.

John's passion for water is not just a personal one. He believes that everyone should have access to clean water, and that we all have a responsibility to protect it. That's why he started the Waterose Foundation, to raise awareness about the importance of water conservation and to provide resources to those who need them.

The Foundation has supported numerous projects around the world, from building wells in rural areas to cleaning up polluted rivers. John's work has made a real difference, and he continues to inspire others to do the same.

I'll See You After Obstacle Practice

It's 10am, and I'm standing on the starting line of the obstacle course at the training center. I'm about to take on one of the hottest and most challenging programs in the world. The Obstacle Course Challenge is a 5K race that includes 20 different obstacles, from walls and water crossings to rope climbs and tarps.

I'm wearing my standard gear: a lightweight running kit, a breathable running shoe, and a reflective vest. I'm feeling nervous but excited, ready to take on the challenge.

The course begins with a 1-mile warm-up run, and then it's on to the first obstacle: a wall climb. I'm running at a steady pace, trying to stay focused on the task at hand. The wall is high and steep, but I manage to make it to the top.

Next comes the water crossing, a 25-yard dash through waist-deep water. I'm drenched by the time I reach the other side, but I'm determined to keep going.

The rest of the course is a series of challenges, each more difficult than the last. I'm pushed to my limits, but I'm determined to keep going. By the time I cross the finish line, I'm exhausted but fulfilled.

The Obstacle Course Challenge is not about winning, but about pushing yourself to the limit. It's about the journey, not the destination. And for me, it's been an incredible experience. I can't wait to do it again.

Must Sell
$25,000,000 Inventory!

Let's beat the California Inventory Tax deadline—March 1st!

Pacific Stereo faces a $25,000,000 California Inventory Tax bill on March 1st! Why not get this to tax savings? Let's do it now with the Pacific Inventory Tax time is your very last time to buy stereo components...at Pacific Stereo!

Pioneer SA-5500B control amplifier, Pioneer precision in a no-nonsense "separates," 100 watts min at 8 ohms, $200 total harmonic distortion. Priced attractively low.

Superscope CD-504 cassette deck, includes Dolby noise reduction, usually found only in much higher priced components. $84

Sanyo PT-6622i monaural stereo cassette player with Sanyo SP-7201 speaker system. A Sanyo control unit to rival anything else out there. $89 complete

Very Best Buys on our Very Best components

Sears new demonstration equipment: $999 SAE 2400L power amplifier $699

AR 10-way speaker with 12-inch woofer $1299

Infinity Quantum 3 4-way speaker with 12-inch woofer $399

Sony PS-57 direct-drive automatic turntable $239

Phase Linear 4000 preamplifier $399

You expect more from PACIFIC STEREO

Weekdays 9 to 9, Sat. 10 to 6, Sun. 12 to 6

More Quality

Look at our inventory. We have some of the finest components at the best prices. With our reputation for service and integrity, you can trust us. In fact, we're so confident of our quality and service that we back every component with our own warranty. So if you're looking for quality and value, come to Pacific Stereo, where you'll find more quality for less money.

And CreditToo

For your purchase in full, we offer a variety of convenient payment plans. Buy now and pay in time. We also offer credit for your purchase. Pacific Stereo is your one-stop shopping place for all of your home entertainment needs. Come see us today and let us help you find the perfect stereo system for your home.

Once, while the pair stood playing the record for the manager of a local Licorice Pizza outlet, a young disco enthusiast strolled up, listened for a minute, and promptly purchased the disc "right off the turntable."
Clang

COLEMAN WARNER

Electric cars with siren horns would mark much of what is to be seen in San Diego this summer. By mid-season there will be more than a thousand cars in operation. The trolley cars may be seen throughout the city, running from one end of the most modern trolley system to the other. These cars are fitted with siren horns, which produce a loud, sharp, and distinctive sound. The horns are controlled by a system of electric relays and are activated automatically whenever the car enters a crossing or approaches a stop signal.

April, 1923

San Diego electric trolley cars are a common sight in the city, and the siren horns add to the noise and excitement. The cars are used for a variety of purposes, including sightseeing tours and transportation for the disabled. The system is well-maintained and continues to operate efficiently.

"That day the traffic was heavier than usual," remembers F. V. Hillard, one of the engineers working the electric trolley system. "It was a busy day, and the cars were running very smoothly. The noise of the siren horns added to the excitement, and people were enjoying themselves. The cars were loaded with passengers, and the sound of the horns echoed through the streets."
READER'S GUIDE TO LOCAL EVENTS

Film

"Chinatown," a film concerning the corruption of the city, will be shown on February 16. (The George, Cinema, 5133 La Jolla Blvd., La Jolla, tickets available at the door.)

Restaurants

Stranger Around These Parts

When we silt open the paper, we discovered gizzards, wings, livers, backs, and little value of what we would normally associate with chicken.

ELEANOR WIDOW

The Restaurant: De La Hoya

The Type of Food: Victorian and Chinese

Price Range: Individual items from $10 to $15

Reservations: Yes

Location: De La Hoya

There's a new in the Italian restaurant circuit and it's called De La Hoya, which is located in the heart of the city. The restaurant has quickly become a favorite among locals and tourists alike, thanks to its upscale ambiance and delicious cuisine.

De La Hoya offers a wide variety of dishes, ranging from traditional Italian fare to more modern, fusion-inspired options. The menu is carefully curated by the restaurant's executive chef, who sources ingredients from local farmers and suppliers to ensure the freshest, most flavorful dishes.

One of the standout dishes at De La Hoya is the spaghetti with vodka sauce. The spaghetti is cooked to perfection, and the sauce is rich and creamy, with just the right amount of garlic and herbs. Another must-try is the seafood pasta, which features jumbo shrimp, scallops, and calamari in a light, savory cream sauce.

In addition to its main courses, De La Hoya also offers a selection of light bites and snacks, such as bruschetta, antipasti, and an extensive wine list to complement your meal. The restaurant's atmosphere is cozy and inviting, with soft lighting and comfortable seating, making it the perfect spot for a romantic dinner or a night out with friends.

With its excellent food, welcoming atmosphere, and prime location, De La Hoya is a must-visit for anyone looking for a high-quality dining experience in the heart of the city.

UP HILL

DUNCAN SHEPHARD

One of the most fascinating aspects of a dream is its power to aggregate, to create a cohesive narrative out of the myriad images and fragments that make up a dream's content. The dreamer may be aware of a particular event or situation, but the dream itself takes those elements and weaves them into a coherent whole.

For example, the dream of a person who has recently broken up with a partner may involve scenes of isolation and abandonment, as if they are being left behind or ignored. The dreamer may also experience feelings of sadness or hopelessness, as if they are unable to move on from the end of the relationship.

The dream of a person who is feeling overwhelmed with work or responsibilities may involve images of being lost in a maze or a labyrinth, as if they are unable to find their way out of the chaos. They may also experience a sense of being unable to control their environment, as if they are at the mercy of circumstances beyond their control.

Similarly, the dream of a person who is feeling stuck in a particular phase of their life may involve images of being trapped in a box, as if they are unable to move forward or make progress. They may also experience a sense of being trapped in a cycle or a rut, as if they are unable to break free from their current situation.

In all these cases, the dreamer is not simply reliving past experiences, but rather using their unconscious mind to process and integrate the emotions, thoughts, and memories that are associated with these events. By doing so, they can gain insight into their own thoughts and feelings, and perhaps come to a better understanding of themselves and their experiences.

COMING UP AT SDC

The Book of Job

February 12

Rehearsals by Walter M. Carroll, Jr.

Still recovering from the December 14 show that marked his
1,450th performance as the title role in The Book of Job,
Walter M. Carroll, Jr. will appear in the title role in a play
about the biblical story of Job, which is the basis for the
1950s film classic written by John M. Coen and directed by
Douglas Sirk.

The carefree life of Job is turned upside down when he
suffers a series of misfortunes: the death of his family, his
house is burned, and he is left with only a single slave, a
diene... He visits the island of Santorini, where he
meets a group of Greek dancers and becomes involved in a
love affair with one of them. The story is set in the
ancient city of Santorini, where the Mayan civilization is
said to have flourished.

MOVIES

FILMS OF THE WEEK

February 12

The Deep

Starring Robert Redford, the film is about a group of
scientists who travel to the bottom of the ocean in a
submarine to study the life forms that exist there. The
journey is fraught with danger, as the scientists must
survive the rigors of the deep sea environment.

The Great Outdoors

A grueling hike through the Hudson Valley, this
movie focuses on a group of friends who embark on a
trip to celebrate the arrival of spring. The journey is
marked by intense physical exertion and emotional
uplifting moments that bond the characters together.

The Man Who Fell to Earth

This science fiction film follows the story of an
extraterrestrial who arrives on Earth and becomes
involved in a series of events that threaten the
existence of humanity.

The Warriors

A retelling of the story of the real-life gang that
fought wars with rival gangs, the film explores the
psychological toll of these conflicts and the
struggles faced by those involved.

The Hunchback of Notre Dame

Set in the medieval city of Paris, this film is
based on the novel by Victor Hugo and follows the
tale of Quasimodo, the hunchback of Notre Dame,
and his love for the beautiful Esmeralda.
