Strait from the Hip

Matthew Alice

Dear Matthew Alice:

It's a beautiful day out there. I notice that commercial aircraft at Los Angeles Field generally take off at a slower rate. Occasionally, however, one will fly by quite high. I wonder if there is a reason for this difference.

On the other hand, the ground is very dry. This wet season has been quite short. I wonder if this is the norm for our area. What are the factors that determine these differences?

Sincerely,

A Friend

The Big News is Small

Technics Micro Series: Musical

performance that defies their size.

The Technics Micro Series turner, preamplifier, and power amplifier present a new and exciting alternative in small-package electronics. The huge circuitry improvements in the new Technics micro integrated circuit (SC) technology makes high sensitivity, FM tones, superb sound, and clean power into these compact units.

Technics Micro Series turner, preamplifier, and power amplifier - 1650

Technics ST-66 AM/FM stereo turner. Unique arrow-shaped Light Emitting Diode (LED) display and the use of the Technics Monolithic Microcircuit (SC) technology results in improved audio performance and better critical tuned circuits, eliminating FM drift.

Technics SC-61 stereo preamplifier. Gold plated connectors protect the easily damaged signals from your turner, tape deck, and hi-fi equipment. The Technics SC-61 stereo preamplifier can make even an advanced system sound like a high-end system.

Technics SC-61 power amplifier. Compact - ideal for powered power supplies without the bulky transformer found in other amplifiers. The SC-61 delivers 40 watts RMS per channel, 80 watts per pair, at an extremely low 0.1% total harmonic distortion.

$1,500 $593 per month

A complete Micro Series music system!

Kenswood Hi-Speed: Faster response for more musical clarity.

The Technics Micro Series turner, preamplifier, and power amplifier present a new and exciting alternative in small-package electronics. The huge circuitry improvements in the new Technics micro integrated circuit (SC) technology makes high sensitivity, FM tones, superb sound, and clean power into these compact units.

SANSUI SEPARATES: DC Keeps Music Pure

You can now combine the warm sound of DC SEPARATES with the high-fidelity sound of SANSUI's DC B-V2. The new DC SEPARATES are designed to produce a soundstage that is greater than 85% of that produced by SANSUI's AC SEPARATES. Complementing it in performance and appearance is SANSUI's sensitive new AKM-628N stereo turner.

$570 for both

The biggest concern, of course, is that NASA will not be able to finance the project. This is a problem because the agency has already spent more than $10 billion on the project, and it is likely to cost another $10 billion to complete. The project is also facing opposition from the public, who are concerned about the environmental impact of the project. In addition, the project is also facing opposition from other countries, who are concerned about the economic impact of the project.

A food festival will be held in Central Park on April 11, sponsored by the New York City Council.

Other Events

A concert will be held at the Lincoln Center on April 11, sponsored by the New York City Council. A film festival will be held in Times Square on April 11, sponsored by the New York City Council.
Record Review

Glitter

An upbeat and fun story of a young man who falls in love with a much older woman. Despite the age difference, their relationship is filled with passion and adventure. The music is top-notch, with a mix of pop, rock, and R&B. The two main characters are fully developed, with relatable emotions and struggles. Overall, a great romantic comedy that will keep you engaged from beginning to end.

Sound the Alarm

Michael Douglas is a powerful and charismatic actor who delivers a nuanced performance as the conflicted businessman. His chemistry with the female lead is electric, and their relationship is the heart of the film. The supporting cast is equally strong, with standout performances from all. The film is visually stunning, with a beautiful score and stunning cinematography. A must-see for fans of the genre and Michael Douglas alike.

Revealing the Man: A Conference for Women & Men

The New England Center for Women hosts a conference aimed at empowering women in the workplace. The event features keynote speakers, workshops, and networking opportunities. Attendees will gain valuable insights and skills to advance their careers. Don't miss this opportunity to grow as a professional and connect with other women in the field.

DUNCAN SHEPHERD

The Chow Foundation is a non-profit organization that works to improve the lives of children in need. They run various programs and initiatives to support education, healthcare, and basic needs. Your donation will help make a difference in the lives of these young people. Thank you for your support!

APRIL FOOLS?

Our team is proud to bring you a special APRIL FOOLS' event that is sure to make you laugh out loud! Don't miss this hilarious night of comedy and fun. Tickets are limited, so make sure to get yours today!

FLYING
THE READER PUZZLE
No. 49 Timber

By Dave Marlos

Here’s the riddle:

Daveito, your uncle has a tree.

Every year, in early March, he finds a baby raccoon in the tree.

By the end of May, the raccoon is 10 lbs heavier than it was when it was born.

By the end of August, it is 20 lbs heavier than it was when it was born.

What kind of tree was it?

A) Oak
B) Maple
C) Pine
D) Redwood

Please solve the puzzle and send us your answer. We’ll announce the winner in the next issue.
