Earth-Shock did indeed close out most of its duties in the United States a few years back, but for Mr. Survey of Mil- likan, the dawn of Earth-Shock's new era is a breath of fresh air. The license to exploit Earth-Shock's talents in the United States is a license to earn money, and Mr. Survey hopes to generate a new multibillion-dollar-a-year industry that will provide jobs. But Survey is not alone in his efforts. Other companies, such as Blue Earth Ltd., have also expressed interest in Earth-Shock. In fact, Mr. Survey and Blue Earth Ltd. have been in talks for several months, and a deal could be announced as early as next week.

Dear Mr. Survey,

Where can I purchase Earth-Shock's music? I would like to buy some for my own collection.

Yours truly,

D. A. Lee

"The people who were critical of the Nolan plan called themselves the smokesacks crowd, and their motto was 'Smokesacks versus Garanoids.' And they called my grandfather Geranium George, and he was defeated by a man named O'Neal. But at the end of four years my grandmother was persuaded to run again, and O'Neal became my campaign manager."
Caliente

The track may be hot, but the horses are not

BOB SHOLL

The Costas Kearin in Tijuana sat five miles from the border, oddly, on a clump of dirt in the desert. A concrete clubhouse, complete with bleachers, was in the center of town with shops. Last but not least, El Niñito, the place which gives the name to the track, the building and surrounding area, the present situation, is a disappointment.

The original Caliente, which was named by the late owner, was a run-down and desolate area before being remodeled into the current facility in 1971. The Caliente track is the result of a combination of factors. It is a combination of factors that make it a popular venue for horse racing.

Caliente is a medium-sized track, not too large and not too small, the kind of place that was built in the early 1960s when the racing industry was booming. There are several reasons for the popularity of Caliente. The average horseman claims that the field of Caliente is about the same as that of the world. They will do well always, but there are few who can make a profit out of it.

Modern Mexican Art

On February 2, 1983, the National Museum of American Art in Washington, D.C., will celebrate the opening of its new exhibition, "Modern Mexican Art: 1900-1983." This exhibition is the first comprehensive survey of modern Mexican art to be shown in the United States. The exhibition includes works by some of the most important artists of the 20th century, including Frida Kahlo, Diego Rivera, and Marcelino L富贵a. These artists have made significant contributions to the development of modern art and have had a profound influence on contemporary artists.

Quilt Show

No one in the family ever thought we made a quilt. For years, I've envied my friend who could make a quilt. But last summer, I decided to give it a try. I bought fabrics, thread, and a sewing machine. I started with a simple design, but it turned out to be a big challenge. I ended up making a quilt that I'm really proud of. It took me about 6 months to complete, but it was worth it. I finally finished it, and it's been a great addition to our home.
