Thinking about getting an AIDS test?

It's worth thinking about. More than 11/2 million Americans are carrying the AIDS virus and the number is growing. They are male and female, young and old, black, white, Hispanic, Asian. They are homosexual and heterosexual. Symptoms

may not appear for many years. There are many ways to be infected with the AIDS virus without knowing it.

AIDS is caused by the human immunodeficiency virus (HIV). It can be detected by a simple test for HIV antibodies that takes about five minutes of your time.
