**The County Supervisor and the Country Club**

By Leona Sewell

John Gibson left a message about being upset that the courthouse was being built on the country club's land. "You'll never get the same kind of problems again," Gibson said. "They made us pay for it with their taxes, but we're not going to let our country club be destroyed." The supervisor replied, "We'll see about that." Gibson said he intended to sue the county if they forced him to sell his land.

Sometimes you just have to laugh at the absurdity of it all. When I first started working in this business, people used to ask me why I was selling mattresses. "Why not just sell beds," they would say. "That's what people want." I would smile and tell them that we do sell beds, but our mattresses are just as important. I learned the hard way.

Seals Without Wetsuits

By Bill Salisbury
PHOTOGRAPHS BY PAUL STACHEL

The Navy SEALs are a bit of an oddity in the world of war. They're the special forces of the U.S. military, trained to operate in the most remote and dangerous parts of the world. But their training is nothing short of brutal. In this article, we'll take a look at their training regimen, which includes exercises like push-ups and sit-ups, as well as scenarios that simulate combat situations. The SEALs are known for their physical fitness and their ability to operate in harsh and unforgiving environments. The article concludes with a quote from a SEAL about their training and what it takes to be a part of this elite force.
Our instructors on the Strand took us aside after Tomlinson died to make sure we understood about hypothermia. They said it kinda sound like it was Tomlinson's fault.
A BALEFUL TALE OF BASEBALL'S BOONIES

Story by Ben Botelho
Photographs by Randy Hultman

Bob had been a professional baseball player for the last three years. Each spring training camp, he spent a month or two in Florida, taking in the sights and sounds of the Sunshine State. He enjoyed the camaraderie of his teammates, the beautiful weather, and the chance to relax away from the pressures of the Major Leagues. But this year was different. He had been traded to a new team, the St. Louis Cardinals, and was struggling to adjust to the new environment. The Cardinals were rebuilding, and Bob was a key member of the roster, but the chemistry was missing. He felt isolated and out of place.

One day, Bob was playing catch with a young fan in the outfield. The boy was around 8 years old, and had idolized Bob since he was a child. He was wearing a Cardinals jersey and had a big grin on his face. Bob was taken aback by the fan's enthusiasm, and decided to talk to him. He asked the boy how he liked baseball, and the boy told him that he wanted to be a professional baseball player when he grew up.

Bob was touched by the boy's determination and told him that anything was possible with hard work and dedication. He gave him a signed ball and encouraged him to keep pursuing his dream. The boy was thrilled, and thanked Bob profusely.

As Bob walked away, he realized that he had made a new friend. He had always loved the game of baseball, but this year he felt like he had lost his connection with the sport. The boy's words reminded him of why he loved baseball in the first place. He thought about the boy's face, and how it made him feel.

Bob decided to start a community baseball program in the neighborhood where he grew up. He wanted to give back to the community that had supported him through the years. He reached out to some of his former teammates and asked them to help.

Over the next few months, Bob's program grew in popularity. Kids from all over the area showed up for practice, and Bob was happy to be a part of it. He loved seeing the kids improve and feel a sense of accomplishment.

But as the summer drew to an end, Bob realized that he needed to focus on his own career. He couldn't keep playing baseball forever, and he knew that he had to make some tough decisions. He talked to his manager and his agent, and they agreed that the time was right to make a move.

Bob was traded to the Seattle Mariners, and he was excited about the opportunity to play for a different team. But he knew that he would miss the kids. He promised to keep in touch and come back whenever he could.

As he boarded the plane for Seattle, Bob couldn't help but think about the boy. He hoped that he would continue to pursue his dream, and that he would never give up on his passion for the game.

Bob had lost a friend that summer, but he gained a new perspective on the game he loved. He realized that baseball was not just a sport, but a way of life. He knew that he would always have a special place in his heart for the boy, and that he would never forget the lesson he had learned that summer.
The day they were about to move into the shelter of the camper shell on Rich's pickup, baseball fans offered them a room.

When I hear people on radio squawking about how much loot somebody like Bobby Bonilla makes, I think of fellows like Rich.

**Into the Mouth of Hell**

**REVIEW**

The film is a straightforward, unadorned tale of an ordinary couple who find themselves in a desperate situation. The setting is a small, isolated town in the mountains, where the couple are trapped by a group of unknown individuals.

The story is told from the perspective of the protagonist, who tries to survive and escape from the danger that surrounds her. The film is well-paced, with a good mix of tension and suspense, and the performances are convincing.

Overall, the film is a solid entry in the horror genre, with a strong sense of realism and a well-crafted script. It will appeal to fans of the genre and to anyone looking for a gripping, well-made thriller.

The Nagging Remains The Same
Deborah Tannen Explores Gender-Linked Communication

I was asked to mediate a conflict between two women, who were friends of 30 years. They had a heated argument over a small issue, which led to a larger one. They both accused each other of nagging and complaining, and I was asked to help them understand each other's perspective.

One of the women, let's call her Sarah, believed that nagging was a sign of disrespect and lacked consideration for her feelings. She felt that her friend, let's call her Lisa, was always criticizing her and pointing out her flaws, which made her feel inadequate and unappreciated.

On the other hand, Lisa saw nagging as a way to bring attention to the issues she felt were important. She felt that Sarah was ignoring the bigger problems, and that her nagging was a way to get her attention and help her see the bigger picture.

I explained to them that nagging can be seen as a way to express dissatisfaction, whereas complaining can be seen as a way to express frustration. Nagging is often directed at making someone change, whereas complaining is often directed at expressing dissatisfaction with something that cannot be changed.

I encouraged them to communicate with each other more openly and honestly, and to listen to each other's perspectives. I also suggested that they find ways to express their feelings without resorting to nagging or complaining.

In conclusion, I believe that nagging and complaining can be harmful in relationships, but they can also be beneficial if used appropriately. It is important to listen to each other's perspectives and to find ways to communicate effectively.

**Chekhov Without the H**

Chekhov is rarely seen in these verdant shores. It's an odd fact, that with so many Russian characters, playwrights, and actors in the city, we don't see more from the Russian playwright. Perhaps it's a testament to the enduring popularity of Shakespeare and the classics. But it's also a shame, because Chekhov is a master of the human condition, and his plays are timeless.

The production turns Carlyle into a Chekhovian setting. Thedrawing room of the city, with its elegant furniture and beautiful windows, is perfect for the plays. The actors bring the characters to life, each with their own unique voice and mannerisms. It's a beautiful thing to see.

The performance is a marvel. The actors are incredible, and the direction is spot on. It's a shame that more people don't see it. But if you do, you'll be glad you did.

**REVIEW**

Chekhov's plays are often called "melancholic" or "bittersweet". But they are not that. They are not about the pain of life, but about the beauty of it. The characters are often seen as hopeless, but they are not. They are resilient, and they are able to laugh in the face of adversity. It's a testament to Chekhov's ability as a playwright, and it's something that we can all learn from.

The production is a beautiful thing, and it's a shame that more people don't see it. But if you do, you'll be glad you did.

In the end, the chances were that he would not have the time or the energy to do any of these things. He was too busy trying to keep the roof over his head.

The most he could do was to try to make it through the day. He had no plans for the future, no hopes or dreams. He was just trying to survive.

Until one day, when he met someone who changed his life.

She was young and beautiful, with a sparkle in her eye. She saw the man for who he really was, not just his past mistakes. She helped him see that he was worth more than he gave himself credit for.

Together, they worked to build a better life for themselves. They learned to forgive and to love. And they learned to live in the present, not in the past.

The man was grateful for the woman, and for the chance to start over. He knew that he still had a long way to go, but he was determined to make the most of the time he had left.

And so, the tale of the man who changed his life is a story of hope and redemption. It shows that no matter how dark the day, there is always a chance for a brighter future.
