A REVOLUTIONARY, **REALLY NEW DOG & CAT FOOD**

Flocken means flake in German

We use no soybeans, wheat, corn, beet pulp, salt nor chicken; therefore, it's non-allergic. Oriental dogs, arctic dogs, dogs from England, Scotland, Ireland, and dogs raised near the water were originally fed fish as part of their diets. Thus, if

fish is not included as part of the diet, the animal may chew at the root of the tail and lick its feet. The animal's body may be here, but its genes still come from the old country. Fish is high in Omega 3. Lamb meal also used.

Educational Background About Ingredients:

HUND-N-FLOCKEN

AMARANTH: The miracle grain from the Aztecs. Known for its high quality protein, easy digestibility and complete essential amino acid content. Amaranth is called the grain of the future.

BEE POLLEN: The richest food in nature. Long thought to increase the potential for a long and healthy life. For airborne allergies.

BETA CAROTENE: Recommended by cancer specialists as an essential part of a healthy diet.

BLUEBERRY: Given to the Royal Air Force to improve vision during World War II.

CANOLA OIL & FLAX MEAL FISHMEAL: Both are high in Omega 3 mono-unsaturate essential fatty acids (EFAs). Omega 3 has been shown to help improve the heart and circulatory system in animals. Vegetable oils never contain cholesterol. Follosterol is found in animal fat and poultry fat.

GARLIC: Excellent as an aid for respiratory problems.

LAMB MEAT: The most easily digestible of all meats and the

MILLET: Contains the richest store of vitamins of all grains.
Millet is the only cereal which is able to support animal life and development when fed as an exclusive diet. (Osborne & Mendle, Yale University)

YUCCA: Has a 2000-year-old history of being used for bone and joint problems. Yucca has odor control for both the body

KATZ-N-FLOCKEN
Similar to HUND-N-FLOCKEN, except we have replaced the
blueberry with catnip and hydrangea. The hydragea valuable
