Easier than asking for a raise.

A lot of people think ridesharing is hard. It really isn't.

It's changing from driving your car alone once a week to driving in a carpool. Or vanpool. Or taking the bus or trolley. Biking. Even walking.

It's changing because you know the facts: Ridesharing once a week cuts smog 20%. And half the smog out there comes from just turning the key in your ignition.

Rideshare. It's a change of pace that's good for the environment. Good for you.

The topics of the songs are as varied as the skills of the performers, although love — bost of the performers, although love — bost of the performance. These songs of romance are effusively sentimental. They depict a lovesick world populated by women who spurn the true love of poor men for the ersatt affections of someone more wealthy or asimly women whose long-

sulfering purity is ignored by drunken, whoring, husbands. The inhabitants of this musical universe are full of longing, separated from the objects of their affection to the point that life becomes unliable, or they are so overcome by passion they virtually go mad.

"For in muldith amore," is fequently initiated by youngsters singing on buses. When sung with proper weepy effect, it sounds as if the singer is going to break down at any moment. "Because of your damned love, my sorrows have no end, your damned love, for your damned to be control my feelings, and my soul continues to consume itself, for your dranned love, I am unable to control my feelings, and my soul continues to consume itself, for your dranned love, I am unable to control my feelings, and my soul continues to consume itself, for your dranned or a fundamental to my feelings, and my soul continues to consume itself, for your dranned are to familiar and so musically unsophisticated. Before you arrival print of the property of the printed to my changed and printed to my changed I have you inside my heart. My lime medialing my scepalar give no showpy your protection.

Another Los Tigres Del Norte song, while just as popular as "Eres mi buena suerte," takes a different view of love. It is called "Corazón de oro," and when sung in bus or bar, it elicits wails of romantic pain from male listeners.

In the middle of my crazy instability I loved and idolized a woman. I gave her my love believing that she loved me but she deceived my poor heart. And that's why, for being unfaithful

IS YOUR DOG A JUNK **FOOD JUNKIE?**

Do you sometimes feel that you could put a blindfold on and pick out a dog food since they are all the same? There are over 50 lamb and rice diets. Solid Gold Hund-N-Flocken (means dog food flakes in German) is totally different from any other dog food on the market.

Bovine Growth Hormones (BGH) are frequently given to beef to make them grow faster. However, BGH caused many dairy cows to develop mastitis. They were then given antibiotics. Then the disease-preventing shots didn't take effect because of the antibiotics. Hund-N-Flocken does not contain beef.

Chickens are frequently given growth hormones to develop big breasts for the fast-food industry. In 1989, breast cancer for women under the age of 25 went up 18% in one year. Breast cancer in dogs is called neoplasia. 60 Minutes surveyed the poultry industry and found that 55% of all chickens surveyed contained salmonella poisoning. Where do you think these contaminated, unfit-for-human-consumption chickens go? Also, see Dr. Virginia Livingston-Wheeler's book, Chicken: Cancer in Every Pot. Hund-N-Flocken contains no chicken.

Ethoxyquin is a chemical preservative frequently put into animal/poultry fat used in pet food. It may or may not be listed as an ingredient. Monsanto* lists it in its Safety Data Report as a hazardous chemical. The warnings say it may cause skin and eye irritations. There also may be gross changes in the liver and kidneys and a problem with the thyroid. There may be a reduction in the survival of the offspring. Hund-N-Flocken contains no animal/poultry fat and no ethoxyquin. We had our food assayed and it contained no ethoxyquin, no BHT or BHA. No other pet food company has done that.

We use fish and lamb as our protein source and canola oil and flaxseed oils, never animal/poultry fat, and never safflower oil. Safflower oil is thought to contribute to the spread of cancer, according to the Linus Pauling Medical Institute. Our grains are the non-allergenic amaranth, millet, brown rice and barley. In our Hund-N-Flocken we don't use soybeans, wheat or com – the grains thought to cause dogs to chew at the root of their tails and lick their feet.

"Every day you take into your body something that will make your body well, or make it sick."

City planned to construct a four-lane roadway through the heart of San Diego's 5000-acre Mission Trails Regional Park, Mission Trails Regional Park, one of the nation's largest eco-logically valuable urban parks. The park contains some of the last prime open space in San Diego and is home to bob-cat, gnatcatcher, coastal sage scrub, and a host of other an-imals and flants. The City's environmental impact report for the project gave it the green light—not surprisingly, since the consulting and engineering firm that wrote the report was the same firm which was awarded the contract to design the roadway! Although the roadway day though the remaining the contract to the contract to design the readway and have been only three miles long, it would have cost miles long, it would have cost taxpayers between \$50 and \$90 million (in construction costs and interest). Jennette: We met on New Year's Eve of 1990, at 4:30 in the afternoon. Within the hour, I went back to his studio to see his pictures of Copper Canyon, I trusted him that much. Then he walked me to Horton Plaza, where I was meeting some friends.

Harry: Jennette comes from the East Coast, and I'm from the West. She sees the world very differently than I do. That makes it all new and exciting.

PICTURE STORY

by the San Diego Historical Society

indbergh Field dedication, August 16, 1928. Following the sale of a \$650,000 bond issue in 1927, city engineers deepened San Diego Bay north of the B Street Pier and used the dredged material to fill in 142 acres of tidal mudflats. Later the field was graded and surfaced with decomposed granite. It sits 15 feet above sea level.

With the aviation boom of the Twenties well established, the field had little trouble attracting customers: Air Tech Flying Service, Ltd. and Pacific Air Transport Company were two of its earliest tenants, building a small (50x100-foot) hangar and combination hangar/depot, respectively.

Since we're all watching the Bulls and the Knicks one night, then Barkley ws. the West on the next, this may be our last chance to catch up on the rest of the sporting world. At least for this week.

From the "Cheap At Twice the Price" file: This week, in Atlanta, the NFL
expansion committee will set the price for two new franchises. The figure of \$175
million per is thought to be the ranson price. St. Louis, Baltimore, Membly, Charlotte and Lecksonville are the five cities still in the running. Two cities will be
selected this fall and begin play at the start of the 1995 season. The franchise fee
for the last NFL expansion (1976) was \$16 million for Seattle and Tampa Bay. about one-third of Barry Bonds's contract with the San Francisco Giants.

After a stormy meeting, the NFL expansion committee agreed upon a franchise fee quivalent to the investock, beach forotage, public and private buildings, timber and mineral deposits of Costa Rica, plus the reproductive rights of that nation's entire population. Using a complicated formula based upon Costa Rica and emographics, four NFL finalists will be announced today in the Atlanta. Sources report that the finalists are the People's Republic of Yemen, the Hiller Youth League of Revaria, Microsoft Corporation and John Madden."

Congratulations to the town of Ismay, Montana, pop. 22. Ismay will change its name to loe, Montana, during this year's football season. Mark well, Sieve Young will never take the Nines to a Super Bowl. He's a choker. The man always rakes in fabulous stats, but when the entire wad is riding on the last two minutes of a must win pame, Young chokes. Forget his MVP stats, the stat that counts is Young's seven turnovers during last year's two playoff sames.

Where do NHL players come from? Well, it starts with a man and a woman. The woman underseas and so does the man. Typically, after they're undersed they are they're undersed they are they're undersed the pair will lie down on a soft surface and begin to exchange affectionate embraces while making gurgling sounds from deep down in their throats. After a while, the man will place his right hand on.. No, you dolts, I mean what gongraphical areas do NHL players come from?

I have it right here. This year, Canada stands at 66.2 percent, Europe 17.2 percent, and the U.S. trails with 16.6 percent.

Let Angela Daily News writer Michael Ventre adds the following to the Going Home Altraedy! H's Only Midnight? Gire: "Darry! Strawberry now predicts he going to the Hall of Fame. The Dodgers probably wish he'd go now so they can replace him with somebody who can hit and field."

Okay, halltime's over, everybooly back to the NBA. See you next week.
