How to read black

I never wanted to be white... I tried to be a black cat with neat hair. I thought that was the problem — the hair. I'd say, "If my hair was straight, then whitey'd dig me." So I got a process...wrong!... You be Puerto Rican with a process. - Richard Pryor, Craps

ruising down Broadway in San Diego. It's Monday morning, the day after Christmas, and the treets are nearly empty. The sun is so hot that I roll down the window, and the cool breath of the morning breeze blows into the car.

A rap beat suddenly cracks the air. As I pull up to

the red light, a sleek black Acura with dark, one-way windows cases up beside me, and the rap music gets louder.

As the driver comes into view. I see he has his window down. I look over at this brother. He is in his late 20s. Gold glistens off his wrist and pinkie finger. But it is his hairstyle that catches my attention: it is faded around the ears cut very close, that is - and rises to an inch above his head, where it is topped off with glossy curls. Dark brown, leaning forward, he is driving pimp style.

Toward an Ethnography of the Afro In an ethnography of black hair, we see that during the '60's and '7' the Afro becomes a significant symbol. At the time the Afro came this hairstyle became a symbol of black independence from establish

white European styles. The black militants wore Afros. The black vative maintained his "white" crew cut or flattop style.

But what did the Afro symbolize for blacks — then and now?

But what did the Afro symbolice for blacks — then and nose! This involves, quite naturally, the whole question of symbolism and hair. Any discussion of hair symbolism will have to take into account one or two of the nost important easys in the field. In the 50s, the psychoanalyst Dr. Charles Beng in his 1931 book. The Unconcension Symbolisman of Hair, chained that a connection existed in the sal conscious between hair on the head and made gentlash. But Professor Leach's theory would be attacked. In 1969, C.R.

"Long hair," Hallpitic wrote, "is therefore a symbol of being in some way outside society, or having less to do with it, or of being less amenable to social control than the average citien. But the means by which nor attains thus condition are of course various by which one attains thus condition are of course various.

"East, the hunter of wild beasts, was a hairy man, while his brother

Jacob, a herduman dwelling in tents, was a smooth man.... A leper must shave off his head, before he is reincorporated back into society (Leviticus 14.8, pk); the Nazarites were never allowed to ut their hair until the end of their separation (Numbers 6.1-18). 
But Halphé also mentions hair "Ancherites wiches, intellectuals, hippies, and women all are long-haired." They all have one thing in common, he claims — they are all sassociated with being outside society, for whatever reason." He then cliniches his point with this observation: "There is considerable enderthe on the first on a sussciation of solventation." There is considerable enderthe on the first on a sussciation observation: Interes consuderance vestence in fact for an association of outside society equals hairines equals animality. Essu, the man outside society, was hairy and associated with wild beasts by his occupation as the hunter of wild beasts. Black hair's meaning during slavery is well described by Dr. Willie Morrow. BEST FRIENDS FIRST. Shy, acventurous, unpretentious 46-year old, 158 lbs., 5'11", seeks attractive lady. 46 or younger, for lasting romance and new adventures. ☎

Joann: I liked the "shy, adventurous" part of Chris's ad. I thought that was an interesting combination.

Chris: I placed an ad because I've always thought that people in bars put up facades.

Joann: When he called me, he sounded shy on the phone so I said, "This sounds extremely painful for you — and very, very difficult."

Chris: I felt I hadn't projected myself very well on the phone. She was more pointed in her questions ...

Joann: ... ever the New Yorker ...

Chris: With Phone Matches we had a chance to talk on the phone first and get to know each other. I found the things she said intriguing.

Journ: On our first date, at dinner, he was so quiet during the meal. I thought, "Oh no, this is a real winner." After dinner we went to the Grover Washington Jr. concert at Humphrey's.

Chris: We didn't really have a chance to talk because we were focused on the concert, so I asked her if she would like to go out a second time. Journ: Our second date was spectacular. We went to the wineries in Temecula. I had so much fun, I giggled — he really opened up.

Chris: In Temecula we had a chance to walk and talk and interact with each other in a quiet setting.

Journ. Since then, it has been absolute joy. There's no way to describe it. We both have a lot in common: education, travel, hiking, camping and sports. He always ties to trick me with sports trivia questions, but generally, I know the answers. Really he's my best friend.

Chris: This woman is different. There isn't superficiality. There's intelligence. She's a person you can talk with.

Joann: We had our wedding in the most beautiful place. We had classical guitar music, French food and lots of champagne.

Chris: It was a coincidence that we married almost a year to the day of our first date.

Joann: I'm a native New Yorker, he's a native Californian; the odds that we found each other were tremendous. We are fortunate . . . I will be happy spending every single moment for the rest of my life with him.

Just as the moon eclipses a constellation of stars, Pink Floyd's monumental 1973 release DARK SIDE OF THE MOON overshadows a fascinating body of early work. These early Capitol releases, dating back to 1967, represent a constant creative metamor phosis paralleled by few artists outside of The Beatles. #### PICTURE STORY

by the San Diego Historical Society

▼ illiputian lawn bowling, anyone? Actually, these two young girls (Ethel Mintzer on the left, "Webbie" Boyden on the right) are demonstrating just one of the myriad physical activities included in the curriculum of the Francis W. Parker School during the late '30s. The Mission Hills private school was founded in 1912 and offered to San Diego parents and students an alternative to the cookie-cutter public school education of the era.

The ball that the girls are balanced atop is

two feet in diameter, constructed for the school by the local Sullivan Lumber Company. Parker's physical education instructor at the time was Mr. Abdullah Ben Tahar Sid, a former circus performer and acrobat. His charges did much more than pose; an account of the time describes Parker youngsters navigating a "slackwire" strung between posts in the courtyard and walking and jumping rope on the wooden balls.
