Cecil Brown responds: Genette, you believe — or so you write in your letter — that "not all stories (cultural or otherwise) are meant to be or should be repeated (verbally or in print)." I disagree with this. Susan: I had a friend who got over 70 responses to her Phone Matches ad. She was busy breakfast, lunch and dinner! One Saturday morning I was screening some of her calls as a favor until suddenly I realized, "This is stupid! Here I am sitting with nothing to do on a Saturday night ..." So I looked in the back of the Reader for myself. And Ron's ad just jumped out at me.

Ron: I got 12 responses. When I heard Susan's, I knew she was the one.

Susan: I think I said, "Can Ron come out and play?" But when we met, there weren't any fireworks at first.

Ron: No. there wasn't a lot of excitement. We had a couple cups of coffee at a French bakery and just talked. I thought she was very nice

Ron: Well, Susan's my angel. She's the most caring, concerned person ... I couldn't find a more perfect mate.

If you don't want to put yourself and your dog in the hands of those professional trainers (although eight hours for \$60 is cheap enough!), you could follow the American tradition

of reckies courage in the face of insuperable odds, and train your dog yourself. I am her to help you. I have had extensive experience with unruly, destructive, surly, violent, and irritating dogs, and have learned through bitter trial and error the beat procedures for dealing with them. Hence these creatures from unprecedented insight into the screet dies of dogs, about which I intend to write a book.

The main principle to recognize

write a book.

The main principle to recognize in training your dog is that your relationship should not be that of master and slave, but one of democratic cooperation between equals. Let us suppose that you and your dog are taking a brotherly walk togother. You wish to go to Vons to buy a pincapple. Your dog wishes to and tear it to bits. Why should you will prevail over this He too has it God given right to life, liberty, and the pursuit of cats.

At this point you have a choice.

At this point you have a choice.

At this point you have a choice. You can try to drag him in the direction of the supermarket, while he tugs furiously in the opposite direction. This will make both of you unhappy. Why not make a simple mental adjustment, and decide that this is a good time for your daily jog.

and that it would be fun to go carcening down the alley into which Tighath Pilkeer has escaped? Now you and your dog are in total agreement. Instead of warfare and frustrating stalemate, you have harmony and invigorating exercise. This does not mean that you have no right to express your desires to your dog. Communication is good. But you must be careful about the emotional implications of the words. and that it would be tun to ea

A better way to express yourself—desert and friendler—would be, "Let's try to go at the same pace." It would be even more more about the property of the pr I'd so much appreciate it if you would indulge me in my slower pace." I have found this wording particularly effective.

Another word you should never use is "Down!" — as, for example, when your dog has leaped up on a distinguished elderly lady outside distinguished elderly lady ourside the opera house and is trying to rip her fors-fur box from her neck. Another phrase you should never use is "Bad dog!" There is no such thing as a bad dog. If your dog, left home alone for an hour, scatters the garbage all over the house, that is not the dog's fault. It is your fault. And, in an ultimate sense, society is to blame.

This brings us to corporal

This is doubtless in part—and perhaps altogether — a consequence of Wendy Warner's age: according to the biographical notes in the program booklet, she is only 20 years old. But in musicians, maturity is not necessarily connected with chronological age. It is always astonishing to has been severely restricted by the brevity of their time in it, nevertheless identifying to the greatest depth with musical works representing the mature reflections of composers of ad-vanced age. Where such young musicians get this intuitive knowledge of something so far beyond their own possible ex-perience is a mystery; but that

capacity to learn, to improve, to break through to the lifegiving core of musical works— and others, for unascertainable reasons, simply do not. In Wendy Warner's case, while any listener will acknowledge the impressiveness of this young musician's achieve-ments, the jury remains out on her ability to develop the most important elements of musical tween an acceptable but not very compelling performance and a performance that from first to last engages not only our attention but our entire being.

The philosophy communicated by this liturgy involves the radical differentiation between two kinds of reality: on one hand, human thought, imagination, and aspiration to the ideal, and on the other, the middless weight and solidity of the physical world — the 'dense substance' of which bodies are made, and the glose on which

we stand.

above it, the curse becomes all the more devastating.

Curse is a stark, inexorably fated drama. People have com-pared it to Greek tragedy, except for one thing: it's also bizarrely funny. At one point, for instance, Weston has passed out on the kitchen table. There are artichokes strewn on the floor, a lamb with maggots is floor, a lamb with maggots acaged nearby, and a lawyer asks, "What's that smeil?" The an-swer, in Shepard's wacko world, is a cornucopio of affactory pos-sibilities: the spreading aegis of Weston's personal stench, the artichokes, the lamb. It could also be the charts for Emma's All project (on the progress) also be the charts for fimma's 4H project (not he proper way to cut up her peet chicken), which Wesley peed on carlier. Or, since the bouse has no front door—a heavy-handed symbol for the family's lack of privacy—it could be something that just cravded in. tape. Who, I say! Since when did I not know new band:

did I not know new band:

disa, Nirona, Cunn in Roses, shakepare's Sister, and UBAG.

(We went to the UBAG concert toold have bated days, And by the said that the could have bated days, And by so many to like, so little time.) So my daughter showed me a picture of the Cure. "Oh, Lotth," I said, "who are these deed worshipers" They were deed worshipers" They were deed worshipers" They were cheek and a cataly strated to drugs they just drink (and drink and denik).

Unlike other bands that jump up and down and throw their instruments around, these guys, just stand there. At the concert, all hand habit face

concert, all Robert had to do was move a hand to his face and everyone screamed. The audience was occured byce-to-band, every minor turn he made (which were very few). Of course, I just stood there (dancsing, dancing on the in-side), trying to feel like I just a stood there (dancsing, dance me feel like I didn't, I still felt excited and somehow managed to enjoy the concert. And, dig nabit, I know thit if they do another they are they do another they are the

hours.

The younger bad boys of rock 'n' roll have replaced the older bad boys. And the attitude is still to have older people tude is still to have older people move on and let younger one take over. So maybe I'll grow up now. Maybe I won't go to any more concerts, just be good, sit at home, and order music from the I'V advertisements. Maybe the next time a neighbor comes over totell implements of turn her music and not mine.

PICTURE STORY

by the San Diego Historical Society

These Rube Goldberg-looking contrap-tions are actually "wave motors" installed on the end of an Imperial Beach pier, circa 1912. They were the brainchild of Charles E. Edwards, a San Diegan who envisioned harnessing the action of the waves that rolled in beneath the pier to generate electricity for the residents of "South San Diego Beach" (as I.B. was then known).

Edwards plunged \$97,750 of his own money into the newly incorporated Edwards Wave Motor Company in late 1908. The other

four shareholders couched up a whopping \$2250 among them. City Engineer Edwin Capps said of Edwards's idea at the time: "Having made an examination of the wave motor I feel assured that it is the most ingenious and practical appliance for transmission of the power existing in waves...." Word has it that these particular wave motors never lived up to their advance billing; still the concept survives to this day among alternative-energy proponents.
