The Meaning of Giving

By Ernie Grimm

t is often said that for the poor and lonely, the holidays are the saddest time of the year; this time of giving, feasting, and being thankful is for them a time of reflecting on the poverty that makes such celebrating difficult or even impossible. At Our Lady of Refuge Catholic Church in Pacific Beach, parish-

ioners led by Martin Magaña, the parish director of catechetical min-istries, gave several poor San Diego families something to be thank-

ful for this Thanksgiving.

Yet other packages containing pictures or inscrip-tions on other rocks arrived at the Fell residence over the years, and rather than laugh-ing, Barry Fell built upon them an extraordinary second

"My husband was a deci-pherer, pronounces Rene, a willow yoman with diapha-nous buttescotch hair." He lowed to decipher hitherto un-decipherable scripts. "At the time of his death (in the sum-urer of 1994), Fell claimed to have accomplished the decod-ing of objects ranging from the Phaistos Disk of ancient Crete to the enigmatic Easter Island status. In the New World, he

studied petroglyphic leavings that convinced him that Celts, Basques, Libyams, and even Egyptians had preceded Co-lumbus in America by hun-dreds and thousands of years. In his role as president of the San Diego-based Epigraphic Society, he disseminated such ideas to followers worldwide. ideas to followers wortdweite. Since Pell's death, disciples in other cities have taken up the martle of Fejigraphic Society leadership, but Rene still lives steeped in the archives of her late husband's passion. She says that Harward University, where Barry was a professor emeri-tus, wants her to send to its Pusey Library all his man-uscripts, letters, notes, and far has daunted the widow Be-sides the source-her arasets will far has daunted the widow. Be-sides the papers, her garage still contains dozens of skulls dug up in Tennessee. Both their un-usual morphology and the re-sults of carbon dating done on them indicate that they are "very, very ancient," says Rene, and she frets that she needs to and she frets that she needs to find a safe home for them, where they won't be suppressed by scientists wedded to more traditional theories about the

traditional theories about the origins of man in America.

The dark side of breaking with orthodoxy — attacks, re-jection, ridicule — was somejection, ridicule — was some-thing to which Barry Fell had plenty of exposure, Rene testi-fies. At the same time, her hus-band enjoyed world renown because of his work in his first field, marine biology, "He ac-tually had doctorates in both the arts and the sciences," Rene

While in graduate school in Edinburgh, Barry diverted himself by learning Gaelic, the Celtic language spoken in Ire-land and Scotland a thousand land and Scotland a thousand years ago. Even his scientific discipline led him back to language. He had "spent most of my life studying the ancient vorges of people who let in scriptions on remote islands which, of course, could only have been approached by sologist 16th oblighed to examine this cyidence, fo, it would have a bearing on how the dispersal abearing on how the dispersal

dabblings in decipherment spread, he received in the mail something which astonished him. "All of my earlier work had been on ancient tablets had been on ancient tablets and cave inscriptions of the Old World, records of the Sea Peoples of the Bronze Age and early Iron Age some 3000 to 4000 years ago," he wrote. But sometime in the early 1970s, a biologist from Texas A&M University named George biologist from Texas A&M University named George Carter began to send him similar North American "documents." These were stone engravings, "either excavated from some archeological site, recorded from chiff faces, or photographed on massive rocks discovered by the early colonists. I had never seen such materials mentioned or illustrated in books on the archae-

ology of the Americas and in-deed was oblivious of their ex-istence," Fell noted. Fell writes that Carter, who had trained as an anthropolo-gist at UC Berkeley, for many wars had been consulting with gist at UC Berkeley, for many years had been consulting with professors of Latin or Greek about the writings but was told that they were not Latin or Greek "nor any script known to [his] consultant[s]." To Fell's eys, however, they appeared to be obvious specimens of east-ern Mediterranean languages such as Libyan and Iberian. "From the information we

After the publication of America B.C., Fell's time became increasingly devoted to studying such inscriptions. He wrote other mass-market books, Saga America and Bronze Age America, and Rene says he even began teaching a course in epigraphy at Harvard. (Students were enthusiastic about it, she says.) Not long afterward, the university offered Fell the chance to become a professor emeritus. "My guess is that he was so controversial

Ignoring a deluge of requests, we'll end the year with our annual pop quiz designed to show you how much smarter you are now than you were 364 days ago —all thanks to the diligence and deslication of yours traity. We covered each of these topics in the past year, so don't white that I'm making up stuff to trick you. Here's a sample question:

I know M.A. would never make up stuff to trick me because: (a) M.A.'s honesty and fine character are legadary; (b) M.A. is a lagradary character, and that's florewith me, homeoth; (c) uft, wa 4 a 4 if a minute path that a lagradary character, and that's florewith me, homeoth; (c) uft, wa 4 a 4 if a minute path the classified ads.

The answer, of course, is, well, it's so obvious! I think we can skip that. So grab that #2 (konderoga and dig in.

1. In the '50s, Quaker Oats cereals gave away deeds to land in the Yukon Territory, a square In the SB, Quaker Outs cereas gave away access to annul new town Tectority, a special inch at a time. Today the deeds are: (a) worth millions, contact Quaker immediately! (b) crammed into a box in your mother's closet along with your third-grade report card, all your baby teeth, a lanyard you made at camp, and those embarrassing toddler pictures; (c) worth their weight in oatmeal.

2. Tap dance lessons for hummingbirds...a bad idea because: (a) they have absolutely no sense of rhythm; (b) the little top hats and tailcoats never fit right; (c) in a kick line, they leat each other senseless with their wings; (d) Tap dance? Hummers are the only birds that can't even walk.

3. If Einstein were alive today, his favorite pop performer would be: (a) Frank Zappa. (b) Dr. Dre, who actually is a real Ph.D.! (French literature, or something like that): (c) F. M.C. Hammer; (d) Olivia Newton-John, granddaughter of his old friend Nobel physicist Max

4. Insect repellant keeps mosquitos away because: (a) the chemicals confuse the bugs' receptors and make us "invisible" to them; (b) we smell so bad, even a mosquito won't get ocar us; (c) when they land on us, the oil makes them slide right off, screaming, to their deaths; (d) gimme a break, Matt, I don't believe any of these.

5. Only one of these statements is correct. Which is it? (a) Marine iguanas bask in the same the they cat in order to cook the food in their stomache, (b) Roadmanners can't five of The I-shirt was organizably the 'eash shirt,' designed so the workers would be get leaves study in their clockes (d) Jamis Jophin was killed by the ClA: (e) Answers a, b, c, and d are bonehead things Alcichanders believed until Al. As of them straight.

6. Disneyland is like Communist China because: (a) it's hard to get the whole truth out
of either one; (b) neither place is much fun; (c) they're both much bigger than they need to be;
 (d) the people who run those places don't like birds very much.

7. Of all the famous body parts discussed this year, I'd most like to see: (a) Einstein's eyes, because they're in a New Jersey bank vault with money and valuables, and I might be able to walk off with some; (b) Edison's breath, because it's in a test tube in a museum in Detroit, a city with lots of good ethnic restaurant; (c) Josef Haydn's skull...um, who s' Josef Haydn's city with lots of good ethnic restaurant; (c) Josef Haydn's skull...um, who s' Josef Haydn's skull...um, who s' Josef Haydn's skull...um

When M.A. published a request for lots of free valuable stuff as a token of appreciation, grateful readers sent: (a) gargantuan green T-shirt from the band Four Inches from the Hoor, plus stickers and promo stuff; (b) agrantuan green T-shirt from the band Four Inches from the Floor, plus stickers and promo stuff; (c) gargantuan green T...

9. Once again this year, M.A. did not answer the question I sent in, even though it was ten time better than the junk that did get answered. This is because (a) M.A. is saving more for that special centennial celebration column; (b) my question is still circulating among the staff of research gnomes, who are all getting a good laugh at my expense; (c) maybe I should have tiped it to that \$20 bill after all.

Okay, that's enough. Trade papers with somebody you didn't copy from, correct them, then add up your score. If you got all of them right, you're a very sick person who needs a good entry-level job to get your life backs or track. If you got all of them wrong, then you'd better pick up a pencil or a crayon or something and start sending those questions in to M.A. immediately. You're severely bett. challenged.

Got a question you need answered? Get it straight from the hip. Write to Matthew Alice. Co the Reader, P. O. Box 85803, San Diego, CA 92186-5803, or fax your questions to 231-0489. or e-mail to matmail@aol.com via the Internet.
