Looking it up in the dictionary had not caused him to get the point; it caused him to write a letter explain-ing to me that "droll" was a nice word.

Examples, had I been making notes, would be endless. Often I am left to think what I would prefer never to have to think that I would get in so much less hot water if only people knew how to read better. And please be assured that I have entertained, albeit not as often, the opposite thought that I would get in cooler water if only

The Michelin travel guides rate tourist attractions on a com-pressed scale of one-to-three stars ("interesting," "worth a detour,"
"worth the trip"). Triple-A travel
guides, although they apportion numerous black diamonds to hotels and aurants, limit themselves to a single star for a tourist attraction of spe-cial merit. And movie critics, whatever their chosen symbol, do not all count alike either. Are three dog bones the exact equal of three suns? Do two thumbs up "and wiggling" amount to

four stars?

The Los Angeles Times, a bit like the AAA books, awards a single star to "films considered especially noteworthy" in its Sunday Calendar listings. But a single star in the San Diego Union-Tribune explicitly translates as "poor" on a scale of one-to-four stars ("poor," "mixed, "worthy," "excel-lent"), with half-star intermediate steps, plus an additional canine pro-file (signifying "dog") to make additional room for fine distinctions at the bottom end of the spectrum. at the bottom end of the spectrum. (Dog lovers can be forgiven for their confusion.) The tattered copy of Steven Scheuer's Movies on TVon my bookshelf spells out a verbal equivalent for each of the half-star steps on the ascent to four stars, "absymal." the ascent to four stars: "aby: "bad." "poot," "fair," "pretty good," "good," "very good," "excellent." The rival Leonard Maltin volume likewise advances in half-star steps, beginning from a deeper base of "BOMB," but

provides no verbal elaboration.

I think the Southeast Asians, espeLeially India, Burma, and that area,
I really eneity their spiritual outlook
on everything. They seem to have a
thing and a much greater understanding of what is going on in the
world. For instance, one of the things
that they talk about is that they still
believe that twirards exist. They
believe that they still be in the hilt,
magic so much as simply someone
magic to much as simply someone Iney don't think of wizards as being magic so much as simply someone who understands how to transform themselves and their personalities to build more toward spiritual out-look. They understand that we're all immortal. They no longer look at things as material they don't believe the world is solid. They think the the world is solid. They think the world is merely our perception. Ve-make it what we want it to be by exciding what we want it to be in our own heads. In trying to build it anto my ide. I think that modern science today is starting to recog-nize that atoms are made up more of space and electrical impulses, which is exactly what a thought is.
