cial development project on the site of the Belmont Park amuse-ment corster. The Hamels urged the council to turn the site into a public park, and initially they had Gotch's support. But when Gotch changed his tune in 1985, and the Hamels learned the co-developer was married to the councilman's chief fundraiser,

Nancy MacHutchin, the Harnels mounted a petition drive to re-call Gotch.

"Belmont Park is the failure we all thought it would be," Hamel says, "There are some businesses that are surviving, but it's nothing like the devel-opers and Mike Gotch said it would be. There's still nothing

# Non-Surgical **Vision Correction** FOR NEARSIGHTEDNESS

There is now a non-surgical treatment for long-lasting correction of nearsightedness (myopia) and astigmatism that is quick, less costly, and without risk.

This vision-correcting procedure was first utilized as a method of improving vision in the early '60s but now vision can often be restored with an accelerated program, in a matter of weeks.

Orthokeratology is designed to quickly reduce the patient's myopic condition and to improve vision with a succession of specially little therapeutic contact lenses which gently reshape the curvature of the cornea.

Advanced techniques and new technology in specialized contact lenses have revolutionated eye care in the field of vision restoration.

Special stabilizing contact lenses are also available to prevent or retard the gradual increase of nearsightedness.

Dr. Michael Satterlee is highly qualified in this procedure, and holds a followship certificate from the International Orthokeratology section of the National Eye Research Foundation, with over 25 years of orthokeratology experience. His practice is devoted to contact lenses and corrective vision care.
