# Non-Surgical Vision Correction FOR NEARSIGHTEDNESS

There is now a non-surgical treatment for long-lasting correction of near sightedness (myopia) and a stigmatism that is quick, less costly, and without risk.

This vision-correcting procedure was first utilized as a method of improving vision in the early '60s but now vision can often be restored with an accelerated program, in a matter of weeks.

Orthokeratology is designed to quickly reduce the patient's myopic condition and to improve vision with a succession of specially fitted therapeutic contact lenses which gently reshape the curvature of the cornea.

Advanced techniques and new technology in specialized contact lenses have revolutionized eye care in the field of vision restoration.

Special stabilizing contact lenses are also available to prevent or retard e gradual increase of nearsightedness.

Dr. Michael Satterlee is highly qualified in this procedure, and holds a fellowship certificate from the International Orthokeratology section of the National Eye Research Foundation, with over 25 years of orthokeratology experience. His practice is devoted to contact les and corrective vision care.

[They] are just humiliated at having to admit they can't pay their bills. I don't think an awful lot of people go into bankruptcy with a smile on their faces. There are some. They think they can file bankruptcy every six years, but it's a minuscule percentage. Then you are people in tears, choked it's a minuscule percentage. Debtors aren't the only parties to a bankruptcy that hope it won't happen again. Creditors lose millions of dollars each year lose millions of dodars each year when people to whom they've extended credit file bankruptcy. How much money a creditor receives from the bankruptcy estate depends on a number of factors. If the debt is secured, the creditor has an interest in the item for which it extended credit (like a home mortgage). Secured creditors can generally take back their collateral to offtake back their collateral to off-set some or all of the remaining debt. Unsecured creditors, Ede-credit card companies, line up-with all the other unsecured creditors and make claims against the bankruptcy state. If the debtor had no assets, the unse-cured creditors walk away, empty-handed.
