

# SAN DIEGO READER KWIC INDEX

**COVERAGE:** 1972-1976: Page 1 stories only.  
1977- : Most material in Section 1 or its equivalent. Included are feature and other news articles; reviews of films, theater, other performances (concerts, operas, etc.), and restaurants; Matthew Alice (Straight from the Hip).

**EXCLUDED:** All material in Sections 2 and 3; letters to the editor, advertisements; calendar of events information (i.e., any listing of events without a review); Reader's Guide to the Music Scene.

## READING THE INDEX:

Subject terms and personal surnames are indexed on a key-word-in-context basis in the center column. For longer entries, all terms may not appear in any one line, but they will appear in other parts of the index.

The right-hand column gives the date and page number. Abbreviations following the page number are:

FR = Film Review  
MA = Matthew Alice (Straight from the Hip)  
PR = Performance Review (other than theater)  
RR = Restaurant Review  
TR = Theater Review

## FINDING REVIEWS:

For film reviews, look under a word from the film title.  
For restaurant reviews, look under the name of the restaurant, or under the type of food. Listings under the word "restaurant" cover only news items, not reviews.  
For theater and performance reviews, look under the name of the individual play, opera, etc., author or composer, or performing group. Names of individual performers are usually not given, although exceptions are made for well-known stars, or for reviews which emphasize information about a specific performer. Locations are often included to differentiate between performances.

**STOPWORDS:** Some common words (e.g., in, of, for, and) are included for clarification but do not appear as index terms. Some place names and non-essential recurring terms were designated as stopwords also: e.g., Diego, Jolla, Theater (when used to specify a performance location).

This index was compiled at the University of California, San Diego Central University Library by Jean Smith and Paul Zarins, with computer programs developed by Earl Balch.

For further information contact: Paul Zarins or Jean Smith
